

# Milestone Reflection

## Self Assessment

Reflect on how well you performed during this sprint. Specifically reflect on:

- How much you have contributed to the documentation/design
- The quality of the work you have contributed to the documentation/design
- How much you have contributed to the implementation
- The quality of the work you have contributed to the implementation
- How productive you have been in general. Are there any changes you can make to become more productive?

## Team Assessment

Think about the team as a whole and reflect on how you function in terms of:

- Communication
- Distribution/delegation of tasks
- Equitable contribution

For each team member reflect on the following:

- How much did that team member contribute (%) to the documentation
- How much did that team member contribute (%) to the implementation

If there are any team members that you feel aren't contributing sufficiently let us know here.

## Submission

Submit a PDF (1 - 2 pages) on ilearn. This will be submitted individually and won't be shared with your teammates.
